Subject: De-allocating contaminated land

Dear Sirs,

I object to this land being given planning permission, I am a daily user of Murieston Trail and believe that further development in this area will have a highly detrimental effect on the trail and its fauna and flora. In addition to the noise, upset and disturbance created (on top of the highly disruptive rail bridge redevelopment) there would be additional traffic, pollution and strain on the already highly used amenities in the area not least Livingston South railway station. These facilities will be placed under additional strain with developments already in the pipeline.

Please de-zone this area from future development.

Regards
Geoff Stevens
