Dear Sirs,

I write to state my objection to any possible future planning applications being submitted for the area of land in Livingston between Tarbet Drive, Teviot Drive, and Murieston Trail, and state my support for de-zoning the land for future development.

I base my views on concerns about the possible risk to the community and surrounding areas as a result of disturbing what I understand to be contaminated ground, and the removal of contaminated through the community.

I further support the retention of the tree preservation order from 2009, and believe that the Murieston Trail area is an amenity that should be preserved for the enjoyment and well-being of local residents, without further disturbance that would be caused by removing trees and building on this area of land.

Yours sincerely,

Iain Millar
