Consultation Response Form

Site ref: H-WB 18 Winchburgh site adjoining Niddry Mains House

- This additional development is further to the 10 year Winchburgh village plan agreed by the villagers and the community council. At the moment there has not been any infrastructure put in place for the present development which has been agreed without adding more houses to this small village.
- There is a septic tank in this field which services houses numbers 123, 125 and 127 Main Street. This is maintained and paid for by the owners of the above properties. What will happen to this should this development take place?
- The electricity supply to these houses is underground in the communal drive and then rises to be overland crossing this field. What will happen to this should this development take place?
- For 22 years I have enjoyed an open aspect and outlook over this field and the small copse bordering it. Any development will destroy this and obviously reduce the value of my home.
- Several years ago Scottish Natural Heritage informed my husband that our house was home to the pipestrelle bats and the surrounding land was a summer feeding ground for these pipestrelle bats and as such was protected. Any disruption and destruction of the natural flora around my house must surely contradict this protection.
