To whom it may concern

In response to the recent communication regarding the development of site H-LV 31 at Murieston Valley, I wish to object to this development plan.

I reside adjacent to the proposed site, and am concerned in regards to the invasion of addition traffic through the community, the continuous traffic that would require to either reduce speed or stop in front of my property to turn left into the proposed development, and continue to do so once the new developed land was complete. This coupled with the potential backing onto or overlooking my property gives me great concern.

As a result of the above, I object to this planning proposal.

Regards

Mr David Boland
