*Sheena Sutherland (Owner)*

***Proposed Local Development***

**Proposed Site H-BA 24**

**ADDRESS Guildiehaugh Depot**

*I would like to register my objection/concerns to the proposed development of the above site off [REDACTED].*

*Being an old cottage of over 100 years and the area for development large, I would be concerned as to the number of trucks and their working hours, their weight, the noise of machinery and possible traffic problems over a substantial amount of time.*

*I having made several complaints to the Depot next door already about Heavy Plant shaking the house to its foundation at times, which has effected chimney stacks having to be rebuilt. A big development would undoubtedly cause further damage my old property during and after such a large development.*

*At present the access to Guildiehaugh on [REDACTED] is a lot higher than the foundation of my house, this would cause constant light pollution equal to that of a strobe in the evenings and long winter month. Right now the Council yard does close on a Friday at 3.30 and does not open till Monday morning which means no traffic after 3.30 and complete respite from the traffic for two days and three nights of the week.*

*The current access point is too close to my property around 20 feet as it stands and constant traffic would be of great concern with the potential of causing structural damage, constant light pollution in the evenings through long winters with a steady flow of traffic would also have an effect on my quality of life.*

*I would also object to Flats /Houses overlooking the property to the rear of the property which would be intrusive.*

*Yours sincerely*

*Ms Sheena Sutherland (Owner)*
