I am writing in reply to your recent letter regarding proposed planning (HLL5) on land at Falkirk Rd (B.S.W Timber)

I object to this development on the following grounds.

A) Access on to Falkirk Rd is already very difficult without additional traffic

B) The above road is used by school-children on a daily basis and would need a lot of re-construction

C) Schools are already full without any further residential development.

I remember the suggested development a few years ago and it was turned down on all these objections

I hope you take these points into consideration. Yours sincerely
