With regards to the above planning number from page 301 in the current planning development process, it has come to our attention that there is a possible plan to create a through road via Academy Place for possible new housing on the hill behind us. We object absolutely to this proposal.

We purchased our house as is was a low volume housing estate with speed ramps with no through road. I have asked our children what they think of the idea of more cars coming through our street, their response was "why can't we just stop all the cars" We don't want more cars coming past when we play". In addition we do not think that the area where housing is proposed be developed for housing at all.

Please register our objection as a family of four (1 letter = 4 objections)

Yours sincerely
