Subject: Proposed development of park in Hillview
Date: 21 November 2015 10:37:36

Sirs,

I wish to lodge a complaint about the proposed housing development at Hillview.

This area is used by many members of the public for walking and cycling. The trees which were planted there many years ago are now established. The public are constantly being reminded that we must plant trees to provide oxygen. Why then can the council cut down trees which are healthy. The trees provide nesting for various species of birds. The drain at the bottom of Hillview Avenue becomes flooded when there is a lot of rain and this is in part caused by the amount of water that runs off the park. The fairground which was used during the gala day had to be moved to another site because of flooding in the park. The access road into Hillview is already dangerous due to the number of cars and buses using it and it will only get worse with more residents.

I appreciate the need for social housing but there are far more suitable sites in Broxburn which could be used.

Isabel Gavin
