Importance: High

This email is sent to you as I have concerns about the proposed residential planning on this site. Some of my concerns are:

Increase in the volume of traffic and parking on a section of the road that has already has limited vision and safety whilst trying to access/leave driveways.

Increase in public transport passengers, resulting in more litter deposited in the burn, next to bus stop, which in the last 6 years I have only witnessed being cleaned once.

The effect it will have on the burn itself, posing an increased risk of flooding to the surrounding area.

I have previously telephoned after receiving my notification letter, but I have not been able to discuss my concerns with anyone from development, planning and environment.

I am requesting a written response to my concerns.

Helen Close
