I wish to contest the proposal of the sale of land for housing on the manse road. This is an area of green site. It is agricultural land. There is no need for 45 more houses around this area. The infrastructure cannot cope with 45 more families moving here. We must protect our children from this development. There is on average 2 cars per family. That is 90 cars. Not forgetting their friends and family. Manse road and surrounding roads get very congested. We need a safe area for our children to play and walk to school. Our children's safety will be compromised especially when the houses are under construction.

There was a proposal a while ago for housing development on Clarendon Farm. This was rejected by the council. So therefore this development must not be considered.

Our countryside is very important, we must protect it at all cost. Not forgetting the protected species that dwell there.

Yours sincerely
Doreen Gmitrzak
