Dear Sir,

I would like to object to the West Lothian
Development Plan especially site H-LL10.

① Transport - Extra cars using the narrow single
lane over the canal bridge at Manse Road. This
bridge is not suitable for extra traffic. Recently
a van ~~was~~ hit a child's buggy.

② Pollution - The High Street has been noted as
having high levels of pollution. Recently the

Scottish Government was stating it wished to reduce pollution but extra traffic along this road would only increase it

③ Drainage - Previous planning applications stated that the canal had insufficient capacity for water draining into it from new houses. There has not been upgrades to the canal which would ease this situation

④ Education - Primary School would be low post (single stream school) but the Local Development Plan states Lurthgas Bridge Primary. Sending children to a primary school which is the furthest away from their home is just not suitable

Secondary School - There are 500 new homes approved at Westfield which would be in Lurthgas catchment area. Has this been taken into account?

②

⑤ Luridbygd is stated as an area of outstanding local beauty. All you would see from the canal or motorway is housing

Yours faithfully

Clare Anderson
