Comment

Winchburgh
(page 97)

We wish to object to the housing plans made next to Winchburgh / Holy Family Primary Schools for the following reasons. For the residents of the surrounding area of the proposed plans, this green space is one of the last in this area for the local kids to play on, away safely from the cars on the road. The roads in the area in question are already too narrow and filled with cars that kids as it stands are not able to be considered safe; building on this land will only push children onto the roads/pavements to play. This particular area is already popular with the local children and gets used a lot by them to play on. Where do you propose children should play should this plan be finalised? The existing roads are not fit for purpose in a modern society due to the many number of 2 car families - bringing more cars into the area will put children in more danger on their own doorsteps. The Scottish Government has already stated its desire to get rid of childhood obesity - getting rid of our local green areas goes against this plan. By removing this area for children to run around and de-stress themselves, you will go against the Governments work to make the Scottish nation healthier. This area is also an eco area used by the schools to promote nature, and already there is wildlife that lives there. Building on this area will impact our ability to easily teach our children the benefits of nature and how to care for it. An additional point for objection is that the council has allocated sufficient land in the wider expansion of Winchburgh to meet the housing need in terms of numbers of units required. They therefore do not required this site to be developed for housing to contribute to the numbers of houses this area needs. Following on from this, the fact that the site has not been developed in the life of the last local plan means that it is not effective otherwise a developer would have built it out by now. It is likely that the cost of stabilising the land due to previous mine workings rendering it unfeasible to develop due to the cost of grouting.
