

West Lothian Council

THE WEST LOTHIAN LOCAL DEVELOPMENT PLAN (LDP)

CONSULTATION RESPONSE PORTAL

Have Your Say on the Proposed Plan

Introduction

West Lothian Council has published its Proposed Plan together with supporting documents including an Environmental Report (SEA), Habitats Regulation Appraisal, Strategic Flood Risk Assessment and Equalities & Human Rights Impact Assessment. These can be viewed on the West Lothian Council website at www.westlothian.gov.uk/proposedplan.

If you wish to make representations on the Proposed Plan or associated documents you are encouraged to use this online consultation portal. It's quick and easy and will help us to process representations more efficiently, reducing the overall cost and environmental impact of the exercise.

You do not need to complete this questionnaire in a single visit. Just simply put your Survey Reference Number (CODE) in the top right corner of the screen to allow you to continue with your submission at a later date.

If you need assistance with completing or submitting your representation online please call the Customer Service Centre (CSC) on 01506 280000. Please advise the Customer Service Centre that your enquiry relates specifically to the Local Development Plan and ask for it to be logged and directed to the Development Plan and Environment Team. Someone will contact you. Alternatively you can email us at wlldp@westlothian.gov.uk We will endeavour to respond as quickly as possible but in any event within 3 working days of receiving your enquiry.

It is important that all representations are submitted no later than midnight on Sunday 22 November 2015. Representations received after that time will not be considered.

Your comments should be concise, having regard to paragraph 84 of Scottish Government Circular 6/2013: Development Planning which states that representations should be no more than 2,000 words plus any limited supporting productions.

Data Protection Statement

Please be aware that when you make representations on the Proposed Plan through the consultation portal (and/or in a conventional written format) personal information provided as part of a representation cannot be treated as confidential. Representations require to be made available online and for public inspection at the council's office (this would include your name but would exclude any information which would be subject to the Data Protection Act 1998 i.e. signature, postal address, telephone number, email).

We are also required to pass these details to the Scottish Government's Directorate of Planning and Environmental Appeals (DPEA). This is because they may at a later date wish to invite you to an Examination in Public of the Proposed Plan to discuss your representation.

Before using the consultation portal you should also note that any information posted may be subject to disclosure under the Freedom of Information (Scotland) Act 2002. West Lothian Council will not be liable for any loss or damage arising from or in connection with the disclosure of any information including the disclosure of user generated content.

Blackburn
(page 82)

The Proposed LDP focuses new housing and other developments on West Lothian's main urban centres and adjacent Core Development Areas. These main settlements will achieve a greater draw on services and facilities as they expand, putting pressure on smaller local centres and towns. It is important that the health and sustainability of all settlements are fully considered, including the smaller towns such as Blackburn. A number of small sites are allocated at Blackburn, each providing a handful of houses. There is only one larger housing site (H-BB7, Redhouse West) allocated at Blackburn, providing approximately 74 houses. Increasing the number of good sized housing sites at Blackburn would help to achieve greater housing choice for local people and ensure good support for local services. Land at the west of Blackburn has the potential to provide significant new opportunities for Blackburn over a number of years. A site location plan has been provided in support of this submission. The site could provide a mix of houses including affordable homes, mixed market housing and larger homes, meeting a range of needs. There is also scope for employment, leisure and community uses, as part of a new mixed use neighbourhood. Much of the site lies on gently south-facing land and its location next to Blackburn ensures that development will read clearly as part of the existing town. There are distant views across the site from the south west but existing development is already visible on the horizon. The site is currently located within designated Countryside Belt. However, the ambition of this policy to maintain separation of adjacent settlements and protect their setting would not be undermined by allocation of the site for housing use. Adequate land would remain between Blackburn and East Whitburn to the west and the M8 and associated woodland provides clear separation to the north. The site extends to approximately 19.6 hectares/49 acres. It forms a natural extension to the west of Blackburn, following the recent construction of St Kentigern's Academy to the south. It is located approximately 500m from the Blackburn town centre. Significant parts of the site would remain undeveloped to achieve satisfactory relationships with adjacent features, including the M8 to the north, where a set back distance and visual screening will be required to manage noise levels and views. To the south and west, green buffers can be provided to integrate the edges of development with the adjacent River Almond to the south and Local Biodiversity sites to the west. New landscaped and wooded areas can be integrated with the green network and the core path route at the east of the site could be extended. It is envisaged that the Council would request a Master Plan to guide development of the site, ensuring that access, landscaping and the layout of the development achieve a high standard. This could be adopted by the Council as Supplementary Guidance, if appropriate. Vehicular and pedestrian access is available from two potential locations at the east of the site, at Riddochhill Road/Ladeside Gardens. Services and drainage are available locally but it is anticipated that upgrading will be required to serve significant housing development. It is known that there is limited waste water treatment capacity at Blackburn. It will be possible to overcome a constraint of this type with a large housing development on a site of this size. The LDP does not indicate any education constraints at Blackburn but contributions to wards education provision would be expected for new development at this site. The SEPA flood map indicates minimal risk of surface water flooding and there are no significant impacts from the River Almond, which affects land south of the site to a far greater extent due to the prevailing topography. Any limited issues should be easily manageable through flood risk assessment and the use of SUDS measures. It is expected that a Coal Authority Report will be required to highlight any issues with previous workings on or under the site. This applies to other sites at Blackburn, including the larger allocated H-BB7, Redhouse West site. The site can provide a source of housing land for Blackburn for a number of years, subject to clarification of ground conditions, noise attenuation, housing mix and the detailed consideration of design and layout. It may provide in the region of 250-350 houses and other uses. It is proposed that the LDP should be amended to allocate this site as a new mixed use neighbourhood, creating a housing supply for Blackburn and supporting its sustainable future.

Land West of Blackburn
Reps by Urban Animation on behalf [REDACTED]

Response to Text :

The Proposed LDP focuses new housing and other developments on West Lothian's main urban centres and adjacent Core Development Areas. These main settlements will achieve a greater draw on services and facilities as they expand, putting pressure on smaller local centres and towns.

It is important that the health and sustainability of all settlements are fully considered, including the smaller towns such as Blackburn. A number of small sites are allocated at Blackburn, each providing a handful of houses. There is only one larger housing site (H-BB7, Redhouse West) allocated at Blackburn, providing approximately 74 houses. Increasing the number of good sized housing sites at Blackburn would help to achieve greater housing choice for local people and ensure good support for local services.

Land at the west of Blackburn has the potential to provide significant new opportunities for Blackburn over a number of years. A site location plan has been provided in support of this submission. The site could provide a mix of houses including affordable homes, mixed market housing and larger homes, meeting a range of needs. There is also scope for employment, leisure and community uses, as part of a new mixed use neighbourhood.

Much of the site lies on gently south-facing land and its location next to Blackburn ensures that development will read clearly as part of the existing town. There are distant views across the site from the south west but existing development is already visible on the horizon. The site is currently located within designated Countryside Belt. However, the ambition of this policy to maintain separation of adjacent settlements and protect their setting would not be undermined by allocation of the site for housing use. Adequate land would remain between Blackburn and East Whitburn to the west and the M8 and associated woodland provides clear separation to the north.

The site extends to approximately 19.6 hectares/49 acres. It forms a natural extension to the west of Blackburn, following the recent construction of St Kentigern's Academy to the south. It is located approximately 500m from the Blackburn town centre.

Significant parts of the site would remain undeveloped to achieve satisfactory relationships with adjacent features, including the M8 to the north, where a set back distance and visual screening will be required to manage noise levels and views. To the south and west, green buffers can be provided to integrate the edges of development with the adjacent River Almond to the south and Local Biodiversity sites to the west. New landscaped and wooded areas can be integrated with the green network and the core path route at the east of the site could be extended.

It is envisaged that the Council would request a Master Plan to guide development of the site, ensuring that access, landscaping and the layout of the development achieve a high standard. This could be adopted by the Council as Supplementary Guidance, if appropriate.

Vehicular and pedestrian access is available from two potential locations at the east of the site, at Riddochhill Road/Ladeside Gardens. Services and drainage are available locally but it is anticipated that upgrading will be required to serve significant housing development. It is known that there is limited waste water treatment capacity at Blackburn. It will be possible to overcome a constraint of this type with a large housing development on a site of this size. The LDP does not indicate any education constraints at Blackburn but contributions to wards education provision would be expected for new development at this site.

The SEPA flood map indicates minimal risk of surface water flooding and there are no significant impacts from the River Almond, which affects land south of the site to a far greater extent due to the prevailing topography. Any limited issues should be easily manageable through flood risk assessment and the use of SUDS measures.

It is expected that a Coal Authority Report will be required to highlight any issues with previous workings on or under the site. This applies to other sites at Blackburn, including the larger allocated H-BB7, Redhouse West site.

The site can provide a source of housing land for Blackburn for a number of years, subject to clarification of ground conditions, noise attenuation, housing mix and the detailed consideration of design and layout. It may provide in the region of 250-350 houses and other uses. It is proposed that the LDP should be amended to allocate this site as a new mixed use neighbourhood, creating a housing supply for Blackburn and supporting its sustainable future.
