

Loo Roll Christmas Wreath

You will need -

- As many loo roll tubes as you can find, but at least 8
- Strong quick drying glue (we used a glue gun)
- Scissors
- Paint
- Ribbon

****Remember once you've glued and painted your wreath, it can't be recycled - keep it for next year!****

Step 1

Squash your loo roll tubes flat and cut them into 2cm wide slices, most loo rolls are about 10cm long so you should get 5 slices per roll.

Step 2

Arrange your slices into a flower shape, 5 petals per flower and glue into place.

Step 3

Once you have several flowers, you can glue them together in a circle and start to form your wreath.

Step 4

If you have enough loo rolls you can attach an extra layer on top to make it more 3D.

Step 5

Paint and decorate to make it look festive and use the ribbon to hang it up!
