

# Odd Sock Pumpkins

## What You Need:

- Sock
- String/Thread/Twine
- Ribbon
- Scissors
- Twig
- Leaf

## Filling

- Rice/Lentils
- Reused Packaging/Plastic Bags

## Instructions

1. Cut the sock just under the heel.

2. Fill the sock with any filling you like, we used a mix of out of date rice and reused plastic packaging.

3. Embed the stick into the rice, leaving a bit poking out the top of the sock. Gather the sock around the stick and tie your string around the sock, holding the stick in the middle.

4. Wrap the string around the base of the sock and back to the neck. Wrap the string around the neck of the sock and stick. Complete 4 times to create 8 sections.

5. Carefully cut the excess sock from above the string.

6. Tie a ribbon round the neck to cover any messy bits of string and make a bow. You can add a leaf from the garden by sliding the stem under one of the strings.

7. Your sock pumpkin is complete!
